LIGHTING YOUR IDEAS

CUSTOMIZED LIGHTING SOLUTIONS

As manufacturers, we have an **R&D department** that has extensive experience developing **technical** and **decorative luminaires** as well as **safety and emergency** lighting. This means that we can:

→ Develop products for any kind of architectural need as well as lighting or decorative requirement. Whether to fulfill a specific project requirement or to create a corporate identity, we can achieve a unique result that will stand out.

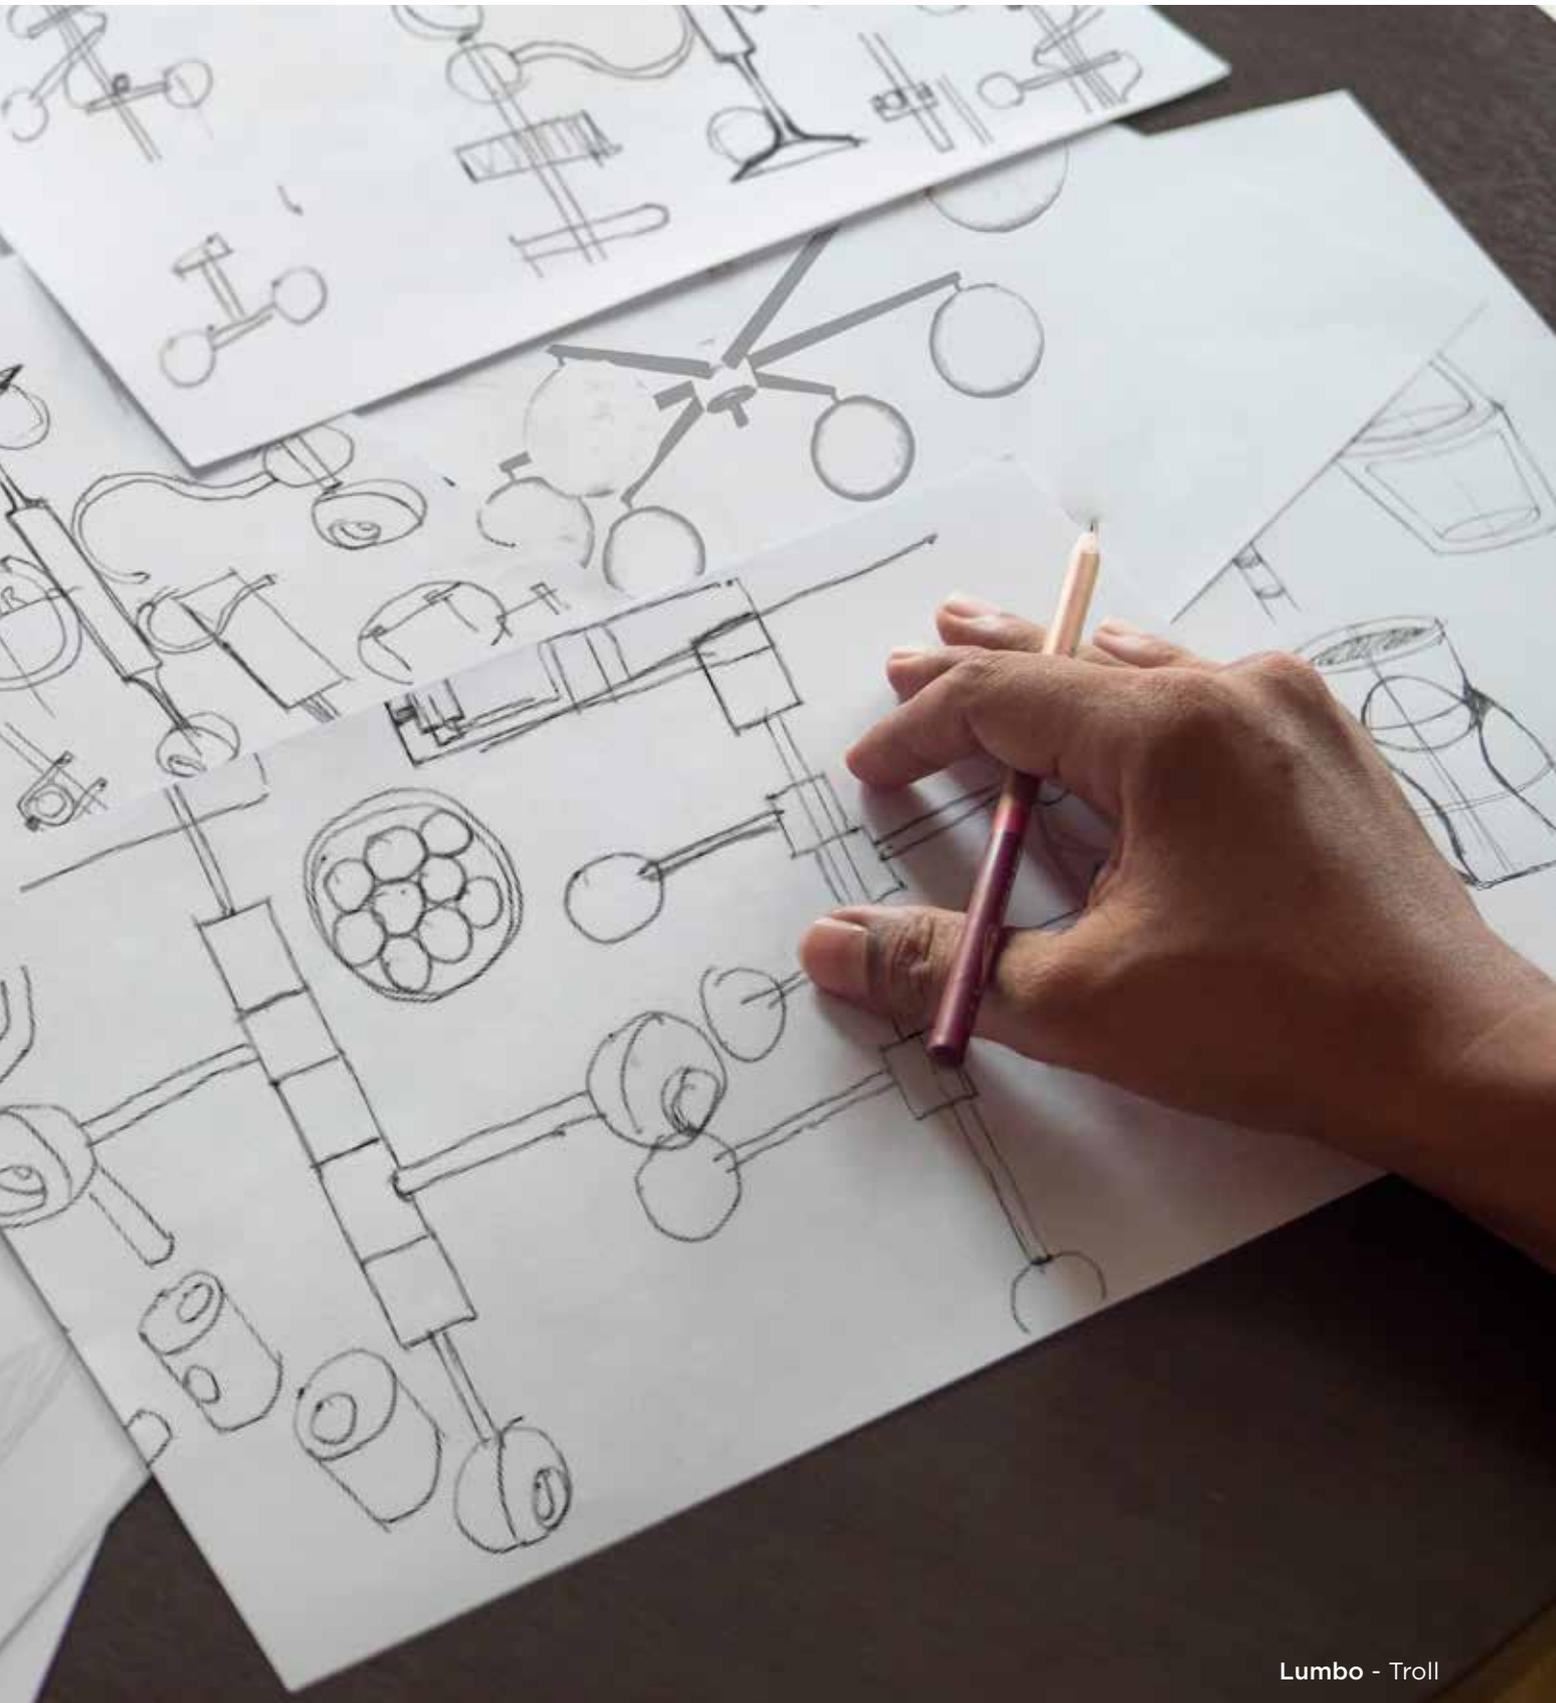

→ Customize our designs and adapt them to the needs of each space, depending on the lighting or decorative requirements. We can create ideal lighting conditions, providing unique and evocative environments.

LIGHTING YOUR IDEAS

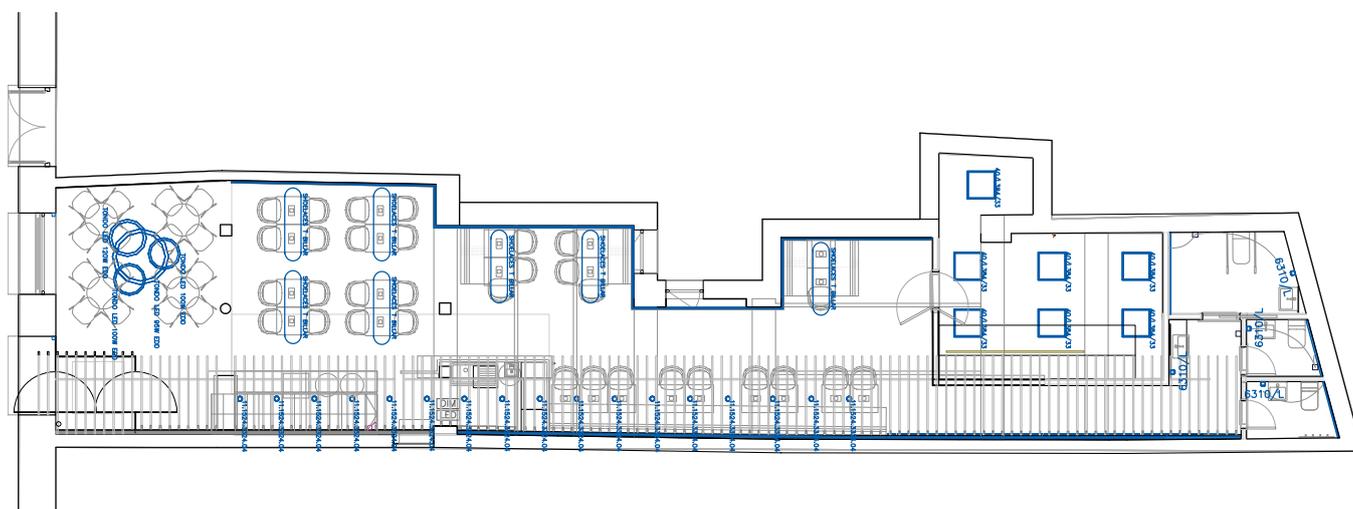

ADVISING YOU FROM START TO FINISH

LUXIONA can provide you with a complete consulting service that will undertake a comprehensive lighting study for each of the areas within your project. We provide personalized advice and monitor the project right up until its implementation.

STEP 1

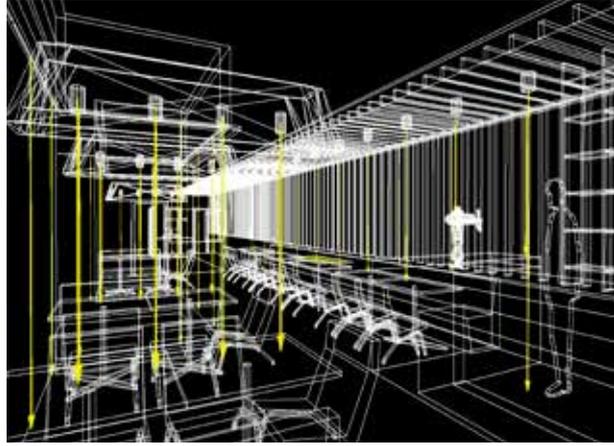

CAD drawings with
the proposed luminaires

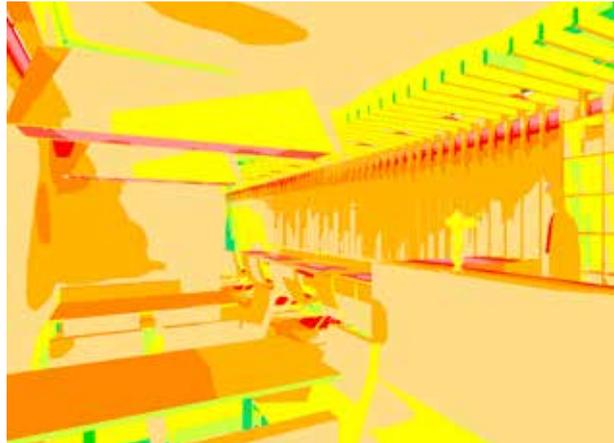

STEP 2

Initial outline of the light study.

STEP 3

Light levels shown by using different colours.

STEP 4

Final outcome of the light simulation for the final project.

LIGHTING YOUR IDEAS

CONSTANTLY INNOVATING

LUXIONA' s R&D department is constantly looking and learning about latest materials and up to date technologies and applications.

Connectivity (IoT) allows us to use lighting to find out more about the customers use of the space. This allows us to understand how it is perceived and helps us to improve its management.

EFFICIENT AND SUSTAINABLE LIGHTING

Efficiency has become a top priority in all LUXIONA projects. Visual luxury and lighting effects must be created with minimum energy consumption, thus maximizing efficiency and contributing to lower operating and maintenance costs.

WE BELIEVE THAT DESIGN CAN ALSO SERVE TO BUILD A BETTER SOCIETY.

Shoelaces is one of Curro Claret's projects. It originated from his collaborations with the company Camper, the Arrels Foundation in Barcelona and the San Martín de Porres Foundation in Madrid. The result was a chain of action, developed around the idea that people who are at risk of being socially excluded could be involved in the creative process.

INTEGRATED LIGHTING

WELL-BEING AND LUXURY

Nowadays, it is not just good illumination that matters, but also improving the user's ability to enjoy a space. Therefore, when luminaires are specially designed for a project, the quantity and quality of light should also be taken into account, creating environments that enhance the user experience.
